

9 ● Cedar Spring (Spring)

10 ● Lone Cottonwood Spring (Spring)

11 ● Teesto Chapter House (Well)

12 ● 7H-480 (Wind Mill)

13 ● Cottonwoods Spring (Spring)

16 ● Tank 507-4 (Wind Mill)

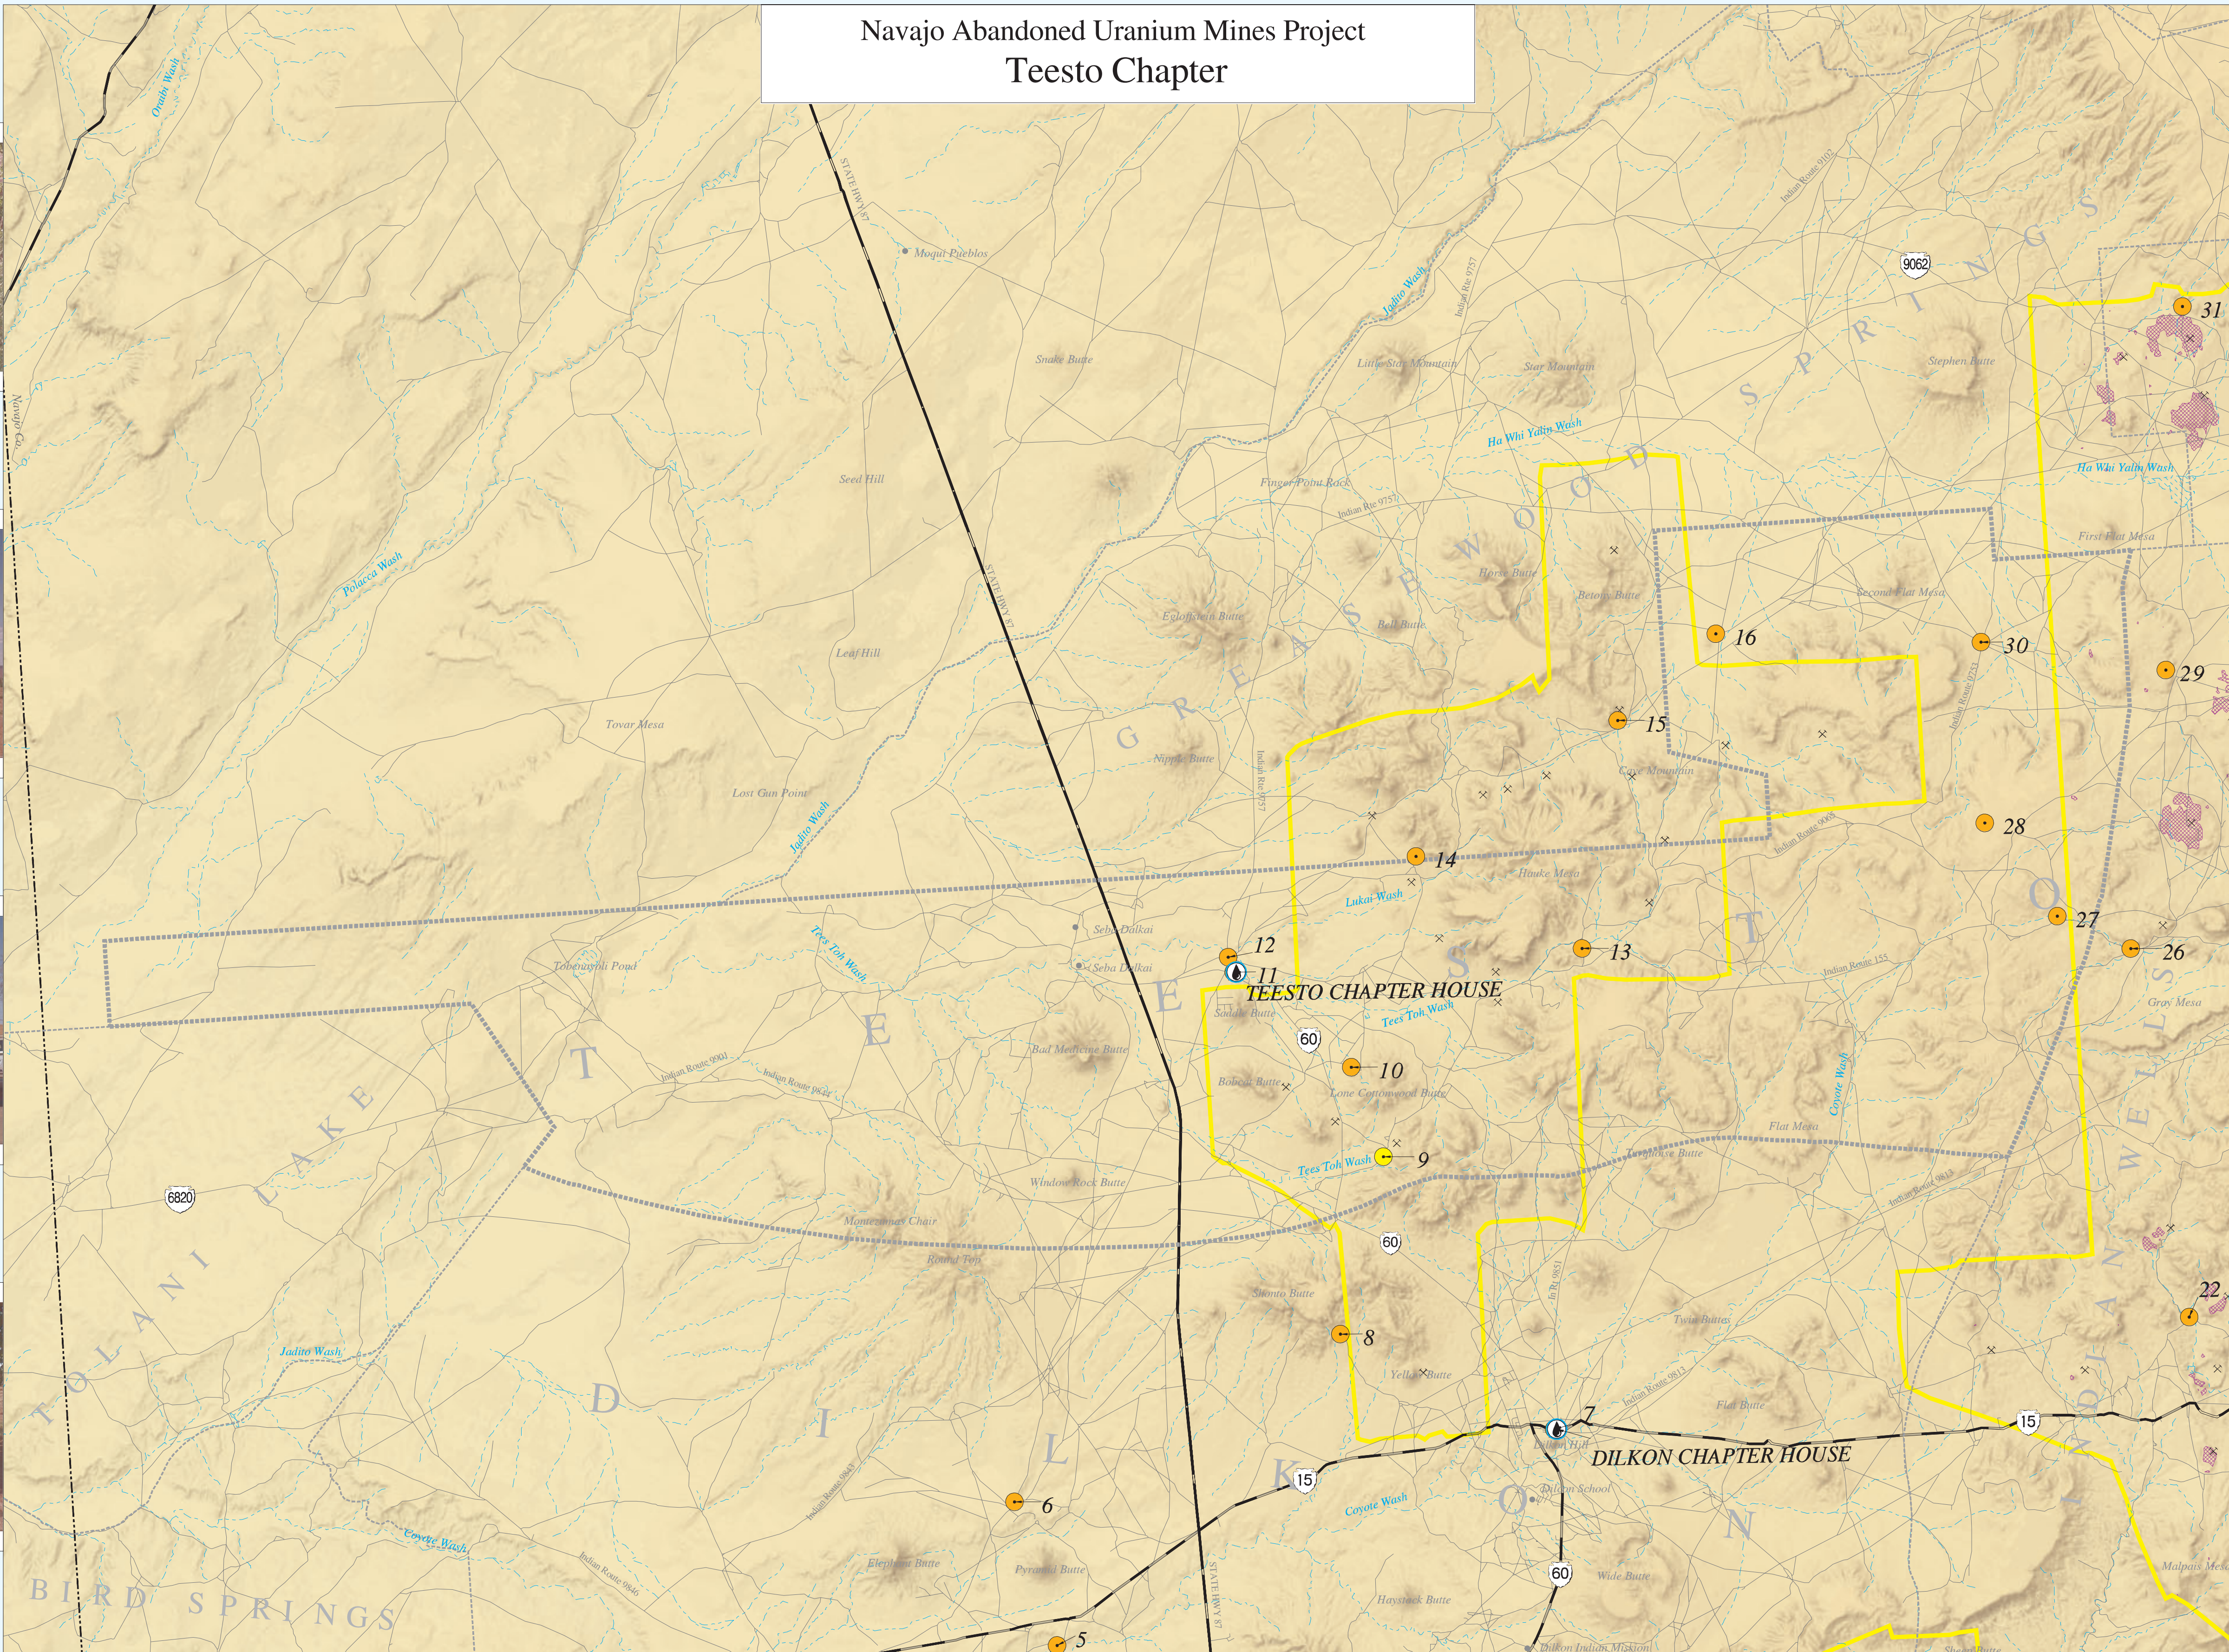

27 ● Coyote Spring (Spring)

28 ● Tank 507-W6 (Wind Mill)

30 ● Tank 507-5 (Wind Mill)

Drinking water should be taken from a public water system, such as the regularly tested NTUA system. You may be putting yourself and family at risk if you use water from an untested location. Only the locations on the map indicated by a water drop ● are tested and confirmed safe.

We are aware that because of cost and distance, many people choose to collect water from a nearby untested location. If you do so, be aware that the sources identified by the red dots ● show unsafe levels of heavy metals or radioactivity at the time they were tested. We will share your drinking water needs with the appropriate Tribal and Federal agencies.

Historic mine location data show known and possible uranium mines or occurrences. These are approximate and were compiled from various sources of varying accuracy.

Chapter boundaries represented here are based on existing maps from the Navajo Nation and may not depict actual, commonly recognized chapter boundaries.

Only selected wells were tested, and not all livestock wells were tested.

Data sources:
Water sampling: US Army Corps of Engineers, sampled with GPS unit of 5-40m accuracy, 1999
Hillshades: US EPA Region, 2000, from USGS Digital Elevation Models, 30m resolution, various years
Survey flight areas and Radiation area: US Department of Energy, 1999
Mines: US Department of Energy, 1999, sources of varying accuracy. SEE NOTE ABOVE
Chapter houses and boundaries: Francis M., Hoskie G., Begay J., Navajo Nation Land Department, 1997

Roads: US Bureau of Census TIGER Line Files, 1:100k scale, 1995
Landmarks: USGS Digital Line Graphs, US EPA, and Arizona State agencies, 1:100k scale, 1981
Counties, Towns and some Roads: Environmental Systems Research Institute and GDT, Inc., 1998
Site photography: Alsup G., US Army Corps of Engineers, 1999

Water sampling locations and associated risk

- LESS RISK
- SOME RISK
- MORE RISK
- Tested and safe to drink

- Area of higher than normal radiation
- Area of radiation testing
